

Seble Mamush

Software Engineering Student · AI & Application Developer

Ethiopia | seblemamush93@gmail.com | github.com/seblemamush93-gif

PROFESSIONAL SUMMARY

Motivated and passionate fourth-year Software Engineering student with a strong foundation in AI systems, mobile app development, and full-stack software development. Proven track record of building computer vision applications, machine learning models, and cross-platform mobile apps. Seeking a Software Engineering / AI Internship opportunity to contribute to innovative real-world projects, solve complex challenges, and grow through collaboration and professional mentorship.

EDUCATION

Mekdela Amba University
2021 – Present
Expected graduation: 2026

B.Sc. in Software Engineering
Key highlights: Strong academic standing, active participant in university tech workshops and community outreach initiatives.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, PHP, Dart, HTML5 / CSS3
Frameworks & mobile: React, Vite, Node.js, Flutter, Java Swing
AI & machine learning: OpenCV, MediaPipe, TensorFlow / PyTorch, Pandas, Scikit-Learn
Databases & backend: PostgreSQL, MySQL, SQLite, JDBC, Socket Programming, RESTful APIs
Developer tools: Git & GitHub, VS Code, Android Studio, NetBeans, Streamlit

FEATURED PROJECTS

AccessVision AI (Planned project)
Planned AI-powered assistive application that will analyze real-time video scenes and recognize objects to convert visual data into descriptive voice updates for visually impaired users.
Python | OpenCV | TensorFlow | Text-To-Speech

SignBridge AI (Planned project)
Planned machine-learning translation system that will convert sign language gestures into real-time text and speech to bridge communication gaps.
Python | MediaPipe | OpenCV | Deep Learning

Food Delivery Application
Built a full-stack food delivery application with menu browsing, cart management, user authentication, multiple payment methods, order status tracking, and live chat with the delivery rider.
React | Vite | Node.js | PostgreSQL

Chat Application
Built a real-time desktop chat application using Java Swing and socket programming, with a MySQL database through XAMPP.
Java | Java Swing | Socket Programming | MySQL (XAMPP)

Student Registration System
Developed a student registration system using HTML, CSS, and Java on XAMPP for registering students and keeping their information organized.
HTML | CSS | Java | XAMPP

House Price Prediction System
Implemented regression models to analyze real estate features and accurately predict housing values.
Python | Pandas | Scikit-Learn

Student Grade Management System
Designed a desktop/web hybrid system for managing student records, automated grade calculations, and generating academic reports.
Java | PHP | MySQL | Swing

Java Smart Calculator
Created a desktop calculator with advanced expression evaluation and custom single-digit backspace undo logic.
Java | Swing GUI

LEADERSHIP & COMMUNITY INVOLVEMENT

Volunteer Technology Trainer — University Community Outreach
Taught core programming fundamentals and digital literacy skills to primary and high school students.

CORE COMPETENCIES & SOFT SKILLS

Analytical Thinking & Problem Solving
Software Debugging & Performance Optimization
Team Collaboration & Agile Communication
Fast Learner & Adaptable to New Tech Stacks

CERTIFICATIONS & ACHIEVEMENTS

Java Programming Certification (Udacity & Online Learning Platforms)
Active Contributor to University Software Development Workshops & Tech Initiatives
